

Summary

B.Tech AI & Data Science student (8.1 CGPA) with internship experience building LLM-powered applications, RAG pipelines, ML models, and full-stack systems using Python, FastAPI, and React. Built AI solutions at IITM Research Park for EV charging analytics and predictive monitoring. IEEE-published researcher targeting SDE / Python Developer / AI Engineer roles.

Education

B.Tech in Artificial Intelligence and Data Science Rajalakshmi Institute of Technology	2023–Present 8.1 CGPA
Higher Secondary School Education Little Flower Matriculation Higher Secondary School	2021–2023 85.83%

Experience

AI/ML Intern – Plugzmart (Meras Plugins Pvt. Ltd.) IITM Research Park	Oct 2025 – Jan 2026 Chennai, Tamil Nadu
- Developed a RAG-based chatbot using LangChain + Neon DB to query energy consumption data from smart meters and IoT sensors across large commercial buildings, eliminating manual meter reading by 100%. - Trained an XGBoost classifier to detect faulty rectifiers with 91% F1-score, enabling predictive maintenance across 200+ EV chargers and reducing downtime by ~25%. - Built time-series forecasting models using TimescaleDB + Scikit-learn for charger degradation prediction; developed LLM-powered monitoring pipelines reducing manual inspection cycles by ~30%	
Research Contributor, EV Research Center Rajalakshmi Institute of Technology	Jan 2024 – Mar 2024 Chennai, Tamil Nadu
Built a real-time ANPR system using Python + OpenCV, achieving 94% plate recognition accuracy across 100+ vehicles/day and eliminating ~2 hrs/day of manual attendance logging.	

Skills

Languages & Frameworks: Python, JavaScript, HTML/CSS, Java |FastAPI, Flask, React, Flutter
AI / ML / GenAI: TensorFlow, Scikit-learn, XGBoost, Hugging Face, LangChain, RAG, Prompt Engineering, YOLOv8, EfficientDet, PatchCore, MediaPipe, OpenCV, Gemini API, Groq
Data & Databases: Pandas, NumPy, SQL, Power BI |PostgreSQL, SQLite, TimescaleDB, ChromaDB, Neon DB, Supabase
Tools & Deployment: Hugging Face spaces, Google Colab, Selenium, n8n, REST APIs, Git, GitHub, Vercel, Streamlit

Projects

SVJM Workspace – Industrial Digitalization & Workflow Platform Flutter, Supabase, PostgreSQL, Gemini API, PDF Automation	2025–2026
- Developed a cross-platform industrial workflow platform using Flutter + Supabase for quotation management, project tracking, and manufacturing coordination. - Reduced quotation generation time from 15 min to <3 min using Gemini API and automated PDF workflows while improving coordination efficiency by ~70%.	
AutoAnnex – Annotation & Defect Detection Platform Python (FastAPI), React, PyQt5, OpenCV, PatchCore, SQLite	2026
- Engineered a full-stack annotation platform with auto-labeling pipelines reducing manual annotation by ~85%. - Trained PatchCore-based defect detection models for scratch/damage localization and centralized experimentation workflows.	
Fetch Flux AI (Copyright Reg. SW-39797/2025-CO) Python (FastAPI), Gemini API, LLM, BeautifulSoup, Selenium	2025
Designed an LLM-powered web scraping chatbot using Gemini API + RAG-style response generation, reducing manual information retrieval by ~80% across 50+ dynamic websites.	
Real-Time Dual Hand Sign Language Recognition Python, MediaPipe, OpenCV	2024
Built dual-hand gesture recognition system using MediaPipe + OpenCV; published at IEEE International Conference on Advanced Computing Technologies 2025.	

Certifications

Python for Data Science, AI & Development — IBM Coursera	Jan 2025
Supervised Machine Learning: Regression and Classification — DeepLearning.AI	Jan 2025
Databases and SQL for Data Science with Python — IBM Coursera	Nov 2024

Achievements & Research

- IEEE Published (2025): First-authored research paper at IEEE International Conference on Advanced Computing Technologies.
- Received Govt. of India software copyright registration (SW-39797/2025-CO) for developing the AI-powered platform “Fetch Flux AI.”
